

May 4: BBC, 9:56 am, Variety of Impacts:

Blood clots at an alarming rate, including
clots traveling to the lungs

(anticoagulants increase the rate
of bleeding); shuts down lungs;

direct viral attack on other tissues;

risk of stroke; higher rates of acute
kidney injury. The volume of cases,

the uncertainty. For some, loss of

muscle mass, depression,

permanent neurologic damage,

lung damage, The lasting impact?

We don't really know at this point.
